-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

The disclosure is objected to because of the following informalities: In the specification on pages 6, 9, 11, and 12 “polyarylmide” appears to be erroneous and should be changed to - polyacrylamide -

Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37-40 and 43-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dreyer et al. 6,660,170 in view of the Terra Tubes publication or Roy 3,839,202. Dreyer et al. disclose (see col. 2 line 61 through col. 4 line 67, and col. 5 line 62 through col. 7 line 54) a method of filtering sediment or silt from a water flow substantially as claimed. The claims differ from Dreyer et al. by reciting that a flocculant material is disposed in the cavity between the filtering surfaces. The Terra tube publication and Roy (see col. 1 lines 4-53 and col. 4 line 1 through col. 8 line 16) that it is known in the art to utilize a flocculant held or encapsulated in a fibrous or mesh material, to aid in filtering water. It would have been obvious to one skilled in the art to modify the method of Dreyer et al. by disposing the flocculating material in the cavity in view of the teachings of the Terra Tubes publication or Roy, to aid in filtering the water.

Applicant's election without traverse of Group III, claims 37-40 and 43-47 in the reply filed on 12/6/05 is acknowledged. The restriction requirement is made final.

Art Unit: 1724

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
